Germany

STEEP MOUNTAINS TO THE SOUTH, SANDY PLAINS TO THE NORTH, FORESTED HILLS TO THE WEST, AND AGRICULTURAL PLAINS TO THE EAST.

Home to over 80 million people, Germany has a long rich history, a diverse array of religions and place notions of family and community high on their list. With over 5,000 types of beer, appreciation runs deep in German society. A passion for bread a symbol of love, tradition and cultural heritage. And crazy “karnevals” where creative costumes show off their boundless zest for life.

Frankfurt

A city of short distances, Frankfurt is possibly the smallest metropolis in the world, home to international trade fairs, Frankfurt sausages and modern skyscrapers that kiss the sky. But it is also one of the greenest cities in Europe with a green belt of meadows, woods and hills. Visit the impressive Städel Museum at the heart of Frankfurt's museum mile. Try the famous Green Sauce or the Handkäs' mit Musik a soft cheese with a marinade of raw onions with a glass of Apfelwein. A melting pot of cultures that invites you to enjoy life to the fullest. Everything is possible in Frankfurt.

Scaling up our events in a sustainable way

AS PART OF OUR UP FOR PLANET & PEOPLE SUSTAINABILITY STRATEGY.

It's more important than ever to do the right thing for the destinations and their local communities. Our commitment is framed within the Up for Planet & People sustainability strategy in Europe & Americas, and we work to ensure that every event or meeting held at our hotels has the greatest positive impact on the planet and people. **How do we do this?**

Up for
Planet & People

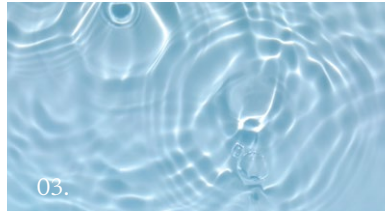

Sustainable Certifications

Minor Europe & America's hotel portfolio is certified, both in environmental impact assessment of the construction and operation of its buildings, as well as in energy efficiency systems for accommodation, services, meetings and events. These include BREEAM, LEED, DGNB, ISO 14001, Green Key, Hoteles Más Verdes, Biosphere and Bioscore.

Responsible Energy Management

We promote an efficient energy management system, defined under ISO 50001 criteria, and prioritise the use of green electricity from renewable sources in all our hotels. 85% of the company's electricity comes from renewable energy sources.

Responsible Water Management

We have implemented water-saving measures such as installing reduction devices in cisterns and innovative water recovery systems. Additionally, we support employee training and awareness initiatives, as well as the redesign of the kitchen and housekeeping operational guidelines to further promote sustainability efforts.

Reducing Single-Use Plastic

We strive to minimise the use of paper and single-use plastics, replacing them with reusable or biodegradable alternatives, when possible, to reduce waste. You'll find returnable glass bottles, biodegradable candy wrappers and pens, which are made from recycled material, in our meeting rooms. Our amenities are single-use plastic free and Eco-Label certified.

Paperless Processes & Sustainable Forest Management

We've digitised both our online check-in and check-out processes, reducing our use of paper. We also use technology to reduce the amount of notebooks we need in our meeting rooms, and we always prioritise the purchase of FSC-certified paper.

Scaling up our events in a sustainable way

AS PART OF OUR UP FOR PLANET & PEOPLE SUSTAINABILITY STRATEGY.

Up for
Planet & People

Local Gastronomy & Healthy Food

We've introducing guests to local gastronomy by providing meals based on km. 0 and seasonal products, ensuring we create a positive impact in our value chain. Healthy food is always available throughout the event.

Food Waste

The food amount is adapted to the needs of the event to avoid waste, and at most of our hotels, leftovers are carefully collected for donation to different soap kitchens we collaborate with.

Our partnership with To Good To Go is also key to combat food waste in our hotels. This initiative, currently implemented in Spain, Portugal, the Netherlands, Austria and Germany for breakfast, is being extended to other Group hotels around the world and implemented in event catering.

Green Mobility

To contribute to making the cities in which we are located more sustainable, we offer environmentally friendly transportation alternatives such as charging points for electric cars or bicycle rental services, and we encourage the use of public transportation.

Accessible Events

Our hotels are becoming more accessible every day, and so are our events. As a result of our commitment to guest diversity, inclusion and accessibility, most of our hotels already care for special needs. And, we continue to strive to make all of our hotels 100% accessible.

Carbon Footprint

We are committed to reducing carbon emissions for all our events. We calculate and offset the carbon footprint of major hotel events, which, due to attendance, have a greater impact on guests and society.
